After downloading the package (GJC_Afterpay_Payment_Virtuemart_3_unzip_first) first unzip it.

 GJC.VM3.AfterpayAus.payment.plugin.3.6.0_1.0.3.zip	Today 15:07	211 KB
 GJC_Afterpay_Payment_Virtuemart_3_Plugin.pdf	22/07/2020 22:14	1.04 MB
 prices.php	Today 15:01	13.4 KB

Use the standard Joomla Installer to install the zip file
GJC.VM3.AfterPayAus.payment.plugin.3.6.0_1.0.3.zip
The success message will appear

Message
Installation of the plugin was successful.

GJC VM Afterpay Australia Payment
Virtuemart 3.0 Afterpay payment plugin.
Please enter the afterpay api data in the Joomla plugin as well as in the VM method!!

Help always available at www.gjcwebdesign.com
Contact at www.gjcwebdesign.com/contact.html

Go to the Joomla plugin admin:

Go to Extensions->Plugins and open the plugin " VM Payment Afterpay Australia".

Enter the your ids and keys from Afterpay.

The screenshot shows the Joomla! administrator interface for the 'VM Payment Afterpay Australia' plugin. At the top, there are buttons for 'Save', 'Save & Close', and 'Close'. Below the plugin name, there are tabs for 'vmpayment' and 'afterpayaus'. The main content area includes the following elements:

- VM Payment Afterpay Australia**
- Sub-menu: **vmpayment / afterpayaus**
- Section: **GJC VM Afterpay Australia Payment**
- Description: **Virtuemart 3.0 Afterpay payment plugin. Please enter the afterpay api data in the Joomla plugin as well as in the VM method!!**
- Help links: **Help always available at www.gjowebdesign.com Contact at www.gjowebdesign.com/contact.html**
- Configuration options:
 - Show on product detail: No Yes
 - Show on product categories: No Yes
 - Payment Mode: Sandbox Live
- Sandbox Credentials** section:
 - Merchant Id:
 - Merchant Key:
- Live Credentials** section:
 - Merchant Id:
 - Merchant Key:

It is a requirement of afterpay that the info displays are shown on the product pages.

The screenshot shows a Joomla! product page for 'Fuel1 19L'. The page layout includes the following elements:

- Product title: **Fuel1 19L**
- Navigation: [Back to: Smelly Fuel](#)
- Product image placeholder: **PRODUCT Image Unavailable**
- Rating: **No Rating: ★★★★★**
- Price information:
 - Sales price: \$ 100.00
 - Sales price without tax: \$ 100.00
- Payment options: **or 4 payments of \$25.00 with [afterpay](#) [Info](#)**
- Quantity selector:
- Action button: **Add to Cart**

To achieve this you need to replace your VM sublayout prices.php with the one supplied in the unzip package.

By ftp transfer the file to templates\YOUR_TEMPLATE\html\com_virtuemart\sublayouts\prices.php

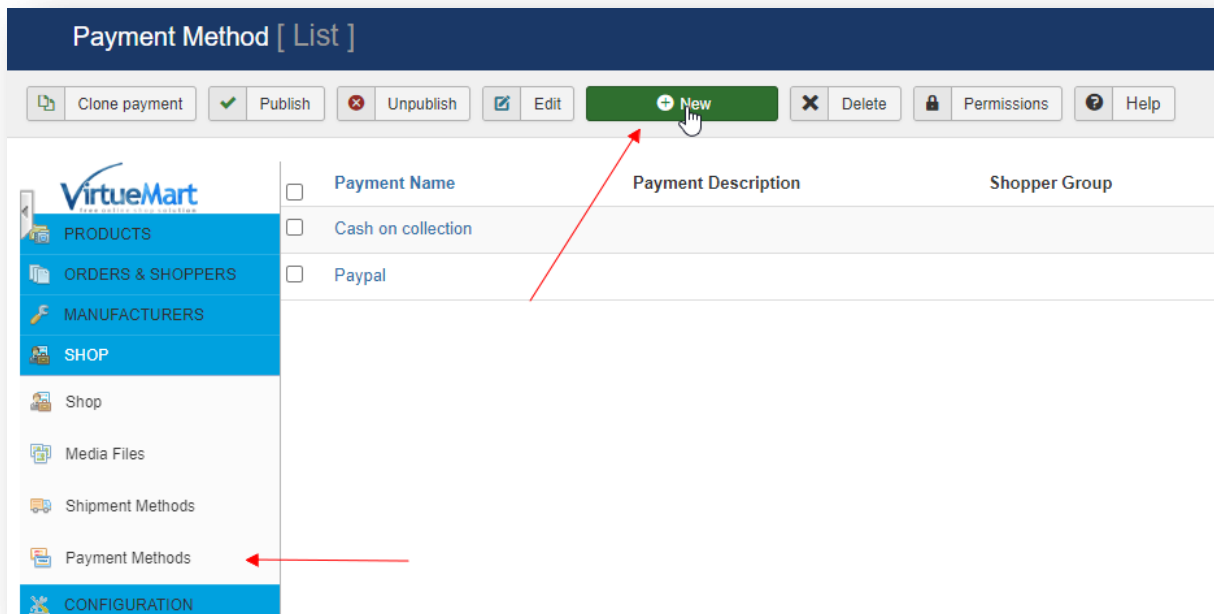

If there is already a prices.php there first rename it to prices.php_original so it is possible to recover it.

Name	Size	Change
..		
login.php	8 KB	14/01/2
prices.php	14 KB	29/10/2
prices.php_original	6 KB	14/01/2
products.php	7 KB	20/05/2
rating.php	2 KB	17/12/2

Make a new Payment Method:

Now go to Components->Virtuemart and browse to Shop->Payment methods. Click on "New".

The configuration page will open.

Give the new method a title like ' Afterpay Payments' and select ' VM Payment AfterPay Australia' as the method. An explanation can go in the description.

Prices display:

Afterpay also require a specific layout for the price displays. This is done via a prices.php over ride.

FTP this to your templates\YOUR_TEMPLATE\html\com_virtuemart\sublayouts\ folder

the display will be then like this:

PRESALE* All Inclusive Pack

★★★★★

\$ 169.95

or 4 payments of \$42.49 with

afterpay Info

PRESALE* All Inclusive Pack

★★★★★

\$ 169.95

or 4 payments of \$42.49 with **afterpay** Info

AVAILABILITY : **IN STOCK**

PRESALE* All inclusive pack "What to get when you can not decide

1 **+** **-** **ADD TO CART**

Configuration:

Save and then click the "Configuration" tab.

Configuration is very simple: you just need your ids and keys from Afterpay.

Use the Sandbox for testing and Live for live.

You can add a fee and choose the various Status for the transactions.

Add the logo from the folder `plugins\vmpayment\afterpayaus\images\afterpay_logo.gif` to the folder `images/virtuemart/payment/`

There is also a debug option if you have some configuration problems.

Approval from Afterpay

Applications will be handled as below.

1. Merchant begins their application for Afterpay at get.afterpay.com
Ecommerce platform will be "Other"
2. Merchant completes the application
3. Afterpay reviews and performs due diligence
4. If any clarification or further documentation is required, that is emailed to the merchant
5. Once approved, an Afterpay Merchant ID is created
6. API Credentials are generated
7. In the case of Virtuemart, an Afterpay technical team member contacts the merchant to build a plan to launch
8. That Afterpay technical team member will, once they know this is Virtuemart and that you are involved, send the API creds
9. Launch

They say to mention VM and GJC Web design in the application at step 7 and this will speed the process as its an "approval lite" that is being done

Our plugin is relatively simple to install and configure and if you need any help we are always here. Just read some of the reviews on Joomla Extensions to see what other customers think of our service!

<http://extensions.joomla.org/extensions/extension-specific/virtuemart-extensions/virtuemart-shipping/20740>

e.g

"I have used GJC Web Designs products a couple of times and found both the extension and the support "A" grade. Recently I requested some mods for the VM Australia post module. Their quote was surprisingly inexpensive but more importantly the speed of development and the follow-up serves as exemplary. This was most important as my client really needed the mod and fast! I experienced a couple of initial problems due to my own mis-understanding of the installation process and they checked my site within minutes and my module was working as expected. GJC Web Designs is the best outfit I have dealt with in relation to Joomla and Virtuemart and my 5-star rating says it all. Thoroughly recommended"

We hope you are happy with your Afterpay payment plugin and would love to hear any feedback or suggestions. Please use our [Support](#) page.

Any reviews are of course encouraged at Joomla Extensions.

Thank you,

John
